Lesson # and Quest	Framework Code	Content Standard and Component Statement	Performance Standard	Performance Expectations
<b>Lesson 1, 2</b> How can you use your knowledge of the commutative property to recall basic addition facts?	<b>3:1.3a(2)</b>  <b>3:1.1a(1 and 2)</b>  <b>2:2.2a(1)</b>	<b>1.3 Algebraic Reasoning:</b> Patterns and Functions-Students should use operations, properties and algebraic symbols to determine equivalence and solve problems.  <b>1.1 Algebraic Reasoning:</b> Patterns and Functions-Students should understand and describe patterns and functional relationships.  <b>2.2 Numerical and Proportional Reasoning:</b> Students should use numbers and their properties to compute flexibly and fluently, and to reasonably estimate measures and quantities.	<b>a.</b> Represent quantities that have the same value with an equal sign.  <b>a.</b> Create and describe patterns using different objects and symbols.  <b>a.</b> Develop fact families of basic facts using the inverse relationship of addition and subtraction.	<b>(2)</b> Demonstrate equivalence using the commutative and associative properties of whole numbers.  <b>(1)</b> Use a variety of materials to construct, reproduce, describe and extend numerical and spatial patterns. <b>(2)</b> Explore and describe patterns and sequences using tables, graphs and charts <b>(1)</b> Recall basic addition and subtraction facts.
<b>Lesson 3, 4</b> How can you use the strategy “Make a Ten” to add and subtract facts to 18?	<b>2:2.2a(1)</b>  <b>1:2.2b(2)</b>	<b>2.2 Numerical and Proportional Reasoning:</b> Students should use numbers and their properties to compute flexibly and fluently, and to reasonably estimate measures and quantities.  <b>2.2 Numerical and Proportional Reasoning:</b> Students should use numbers and their properties to compute flexibly and fluently, and to reasonably estimate measures and	<b>a.</b> Develop fact families of basic facts using the inverse relationship of addition and subtraction.  <b>b.</b> Add by counting and combining and subtract by separating, comparing or counting on.	<b>(1)</b> Recall basic addition and subtraction facts.  <b>(2)</b> Develop, describe and use a variety of strategies to add and subtract one-digit numbers.

		quantities.		
<b>Lesson 5, 6</b> How can you use mental math strategies to find sums and differences without doing the written problems in your head?	<b>2:2.2a(1)</b>	<b>2.2 Numerical and Proportional Reasoning:</b> Students should use numbers and their properties to compute flexibly and fluently, and to reasonably estimate measures and quantities.	<b>a.</b> Develop fact families of basic facts using the inverse relationship of addition and subtraction.	<b>(1)</b> Recall basic addition and subtraction facts.
	<b>2:2.2c(2)</b>	<b>2.2 Numerical and Proportional Reasoning:</b> Students should use numbers and their properties to compute flexibly and fluently, and to reasonably estimate measures and quantities.	<b>c.</b> Identify and use equivalent representations of numbers to estimate and compute.	<b>(2)</b> Explore and describe strategies for representing, estimating, adding and subtracting two two-digit numbers with and without regrouping.
<b>Lesson 7, 8</b> How can your knowledge of rounding and estimating help you solve multi-digit addition and subtraction problems?	<b>3:2.2a(2)</b>	<b>2.2 Numerical and Proportional Reasoning:</b> Students should use numbers and their properties to compute flexibly and fluently, and to reasonably estimate measures and quantities.	<b>a.</b> Use strategies that involve place value patterns and algebraic properties to estimate, add and subtract.	<b>(2)</b> Compare and round numbers to the nearest 10 and 100.
	<b>3:2.2b(1 and 2)</b>	<b>2.2 Numerical and Proportional Reasoning:</b> Students should use numbers and their properties to compute flexibly and fluently, and to reasonably estimate measures and quantities.	<b>b.</b> Approximate solutions to problems involving computation through the use of efficient methods.	<b>(1)</b> Estimate, add and subtract with two- and three- digit numbers using a variety of strategies. <b>(2)</b> Use estimation strategies to determine and justify the reasonableness of a computational answer.
	<b>2:2.2a(1)</b>	<b>2.2 Numerical and Proportional Reasoning:</b> Students should use numbers and their properties to compute flexibly and fluently, and to	<b>a.</b> Develop fact families of basic facts using the inverse relationship of addition and subtraction.	<b>(1)</b> Recall basic addition and subtraction facts.

		reasonably estimate measures and quantities.		
<b>Lesson 9, 10</b> How can you use mental math strategies to solve multi-digit whole number addition problems in your head?	<b>3:2.2a(1 and 2)</b>	<b>2.2 Numerical and Proportional Reasoning:</b> Students should use numbers and their properties to compute flexibly and fluently, and to reasonably estimate measures and quantities.	<b>a.</b> Use strategies that involve place value patterns and algebraic properties to estimate, add and subtract.	<b>(1)</b> Identify 10 and 100 more and less than a number. <b>(2)</b> Compare and round numbers to the nearest 10 and 100.
	<b>3:2.2b(1 and 2)</b>	<b>2.2 Numerical and Proportional Reasoning:</b> Students should use numbers and their properties to compute flexibly and fluently, and to reasonably estimate measures and quantities.	<b>b.</b> Approximate solutions to problems involving computation through the use of efficient methods.	<b>(1)</b> Estimate, add and subtract with two- and three- digit numbers using a variety of strategies. <b>(2)</b> Use estimation strategies to determine and justify the reasonableness of a computational answer.
	<b>2:2.2a(1)</b>	<b>2.2 Numerical and Proportional Reasoning:</b> Students should use numbers and their properties to compute flexibly and fluently, and to reasonably estimate measures and quantities.	<b>a.</b> Develop fact families of basic facts using the inverse relationship of addition and subtraction.	<b>(1)</b> Recall basic addition and subtraction facts.
<b>Lesson 11, 12</b> How does understanding place value help you when you are adding and subtracting	<b>4:2.2a(3)</b>	<b>2.2 Numerical and Proportional Reasoning:</b> Students should use numbers and their properties to compute flexibly and fluently, and to reasonably estimate measures and quantities.	<b>a.</b> Use place value concepts and commutative and associative properties to estimate and compute.	<b>(3)</b> Use place value concepts, number patterns, the number line and the commutative and associative properties to develop estimation and computation strategies
	<b>3:2.1a(1)</b>	<b>2.1 Numerical and Proportional</b>	<b>a.</b> Represent numbers in	<b>(1)</b> Use models and expanded
